## PROFILE

- Full Stack Developer experienced in building modern web applications using JavaScript, React, Next.js, Laravel, and MySQL. Skilled in developing responsive interfaces, RESTful APIs, database management, and frontend-backend integration. Passionate about creating clean, scalable, and user-friendly applications.

## EXPERIENCE

### INTERNSHIP EXPERIENCE

- SMA Negeri 1 Ciamis as The Library Administration
- EKG Mart Ciamis as The Design and Development of Web-Based Inventory Information System

### WORK EXPERIENCE

July 2019 - June 2025

#### **blibli.com - Return Administrator, Jakarta, Indonesia**

- Maintained personnel records and updated internal databases to support document management.
- Handled sensitive information discreetly, maintaining strict confidentiality at all times as required by company policy or legal regulations.
- Collected, arranged, and input information into database system.

#### **Freelance Full Stack Developer | 2018 – Present**

- Developed and maintained full-stack web applications based on client requirements and business needs.
- Built responsive and user-friendly interfaces using JavaScript, React, Next.js, and Tailwind CSS.
- Developed backend services and RESTful APIs using Laravel and PHP.
- Designed and managed relational databases using MySQL.
- Integrated frontend applications with backend APIs and implemented authentication, CRUD operations, validation, and business logic.
- Handled application testing, debugging, deployment, and ongoing maintenance.
- Collaborated directly with clients to gather requirements, provide technical solutions, and deliver projects from development to production.

## SKILLS

- Languages: JavaScript, PHP, HTML5, CSS3, SQL
- Frontend: React.js, Next.js, Tailwind CSS
- Backend: Laravel, RESTful API
- Database: MySQL, Supabase
- Tools: GitHub, Postman, npm, cPanel, Vercel
